CASH RECEIPTS, JANUARY-MAY 1954

Farmers received approximately 10.3 billion dollars from marketings in the first 5 months of 1954, or 4 percent less than they received in the corresponding period last year. Receipts from livestock and products totaled 7.0 billion dollars, almost the same as a year ago, but crop receipts of 3.3 billion dollars were down 10 percent. The decline in total crop receipts was mainly the result of a smaller volume of crop marketings, though prices also averaged lower. In the case of livestock, slightly lower average prices were offset by increased marketings.

These estimates reflect some revisions in previously published estimates for January through April. The new monthly totals and the

(Continued on page 2)

AGRICULTURAL MARKETING SERVICE

preliminary estimate for May are given below, in millions of dollars, together with month-by-month comparisons with 1953:

	<u>1953</u>	<u>1954</u>	<u>Percent change</u>
January	2,778	2,611	-6.0
February	1,902	1,946	+2.3
March	2,094	1,990	-5.0
April	1,983	1,881	-5.1
May	<u>1,975</u>	<u>1,900</u>	<u>-3.8</u>
Total	<u>10,732</u>	<u>10,328</u>	<u>-3.8</u>

The revisions take into account more up-to-date information on volume of sales from the 1953 crops. Some minor changes also have been made in the livestock estimates. The net effect has been only a slight reduction in the cumulative national total through April as previously published. There are significant changes in the figures for some States, however, because new data on the monthly sales of cotton lint have been incorporated. Revised monthly estimates by commodity groups and by States are given in the accompanying tables.

The 10-percent decline in total crop receipts in the first 5 months was mostly in wheat, cotton, soybeans, tobacco, and vegetables. Total livestock receipts remained about the same as a year ago because declines for chickens, eggs, and dairy products were offset by a substantial increase in receipts from hogs.

Total cash receipts in May are tentatively estimated at 1.9 billion dollars, slightly more than in April but 4 percent less than in May a year ago. Livestock receipts of 1.4 billion dollars and crop receipts of 0.5 billion were both slightly below last year.

Revised State totals of cash receipts for the first 4 months of 1954 are given in table 7, together with similar data for the comparable period of 1953. Percentage changes from 1953 to 1954 vary widely among the individual States, ranging from an increase of 18 percent in South Dakota to a decline of 30 percent in Arizona. Altogether, some 17 States had larger receipts from the sale of farm products in the first 4 months of the year as compared with the same period in 1953. In interpreting these changes, however, it should be remembered that the early months of the calendar year represent the tag end of the marketing season for many crops. Since the great bulk of farm marketings occurs in the second half of the calendar year, there can be no assurance that changes indicated for the early months will persist throughout the year. This is particularly in point for such States as Wyoming, Vermont, and West Virginia, where small absolute changes resulted in substantial percentage changes.

The 18-percent increase in South Dakota was due to increased marketings of corn from the larger 1953 crop, and an increase of 10 percent in the 4-month total of cash receipts in Montana resulted from increased marketings of wheat from the larger 1953 crop. Otherwise, most of the significant increases in total cash receipts were in the corn-belt States, where higher prices for hogs were the deciding factor.

Many of the larger declines shown in table 7, including those in Arizona, New Mexico, and Mississippi, are the result of smaller cotton marketings this year than last year. In almost all such cases, the reason is that a smaller fraction of the 1953 crop was left over for sale in 1954 than was left over from the 1952 crop for sale in the early months of 1953. Other significant declines, notably in Maine and Idaho, were due to lower prices of potatoes.
